

## ADVANCED FIRMWARE UPDATE

Unzip file in your desktop as is.

## Instructions

---

- 1 Power off the device.
- 2 Connect both pc and device with the USB cable.
- 3 Press return button and don't release it.
- 4 Plug the AC adapter.
- 5 The return button can be released now, install windows driver according your OS.

- 6 Run RKBATCHTOOLEXE.

Note: Under W7, this tools must be run under administrator permission. Do do this you need to right click the RkAndroidTools.exe icon and select RUN AS ADMINISTRATOR

- 7 Choose firmware.

- 8 Make sure the device is in upgrade mode. If it is, the box with the "1" will be green.

If not, press "SWITCH" button

- 9 Click "Upgrade" to upgrade your device. It takes about 10 minutes to complete. You will see a flashing yellow box during reprogramming. Do not interrupt. When finished, you will get this message:

- 10 After you see the recharge battery screen, you may disconnect the USB cable.

- 11 Done.
